

# Off Camera Flash Workshop

Presented by Buffalo-Niagara Professional Photographers

April 19, 2011 • 6:30 - 10:00 p.m.

Advantage Media Productions • 154 Christiana Street • North Tonawanda

---

This program focuses on off-camera flash in a variety of setups. Four hands-on stations will be set up:

- Cable-tethered off-camera flash and effective bounce skills
- Infrared controls built into your flash systems and multiple flashes along with ETTTL controls
- Radio controlled off-camera flash and high speed sync with radio controls. Including the new AC3 Pocket wizard controller
- Quantum Lights in a multiple-light set-up and radio controls through the new Treo controller

The class will discuss and demonstrate techniques to balance your ambient light and flash source lights on subjects. We will discuss the advantages of radio controls over infrared and why and you may be having trouble with outdoor shoots and balancing your lights.

Bring your cameras and flashes to this hands-on learning experience. After a short lecture and demonstration at each station, you will be shooting and learning. This is one not to miss!

---

Doug Hansgate runs Advantage Media Productions, a full-service photography and video production studio that has been in operation since 1995. He has been shooting professionally for over 35 years and has grown with the technological changes that we have all seen throughout the last several decades. As a sought-after instructor in Adobe products (Lightroom™, Photoshop™, Sound Booth™, and Premiere™) and a variety of other programs including HDR software applications, Photshop Plugins (Nik™, alien Skin™, OnOne™, Portraiture™, Imagnomic™ and Topaz), system management tools, and artistic tools (Corel Painter™, Photoshop Painting), Doug has consistently shown his technical prowess. As a photographer, he teaches studio lighting, light metering for consistent lighting ratios, off-camera flash, natural light portraiture and fashion photography. He is currently working on two books due to be released in late 2011 and is getting ready to launch a new online educational program.
